

Come together.

Working with all currently supported versions of AutoCAD® software, Autodesk® Facility Link helps you make visual connections between objects in your facility drawings to Autodesk® FMDesktop software database records. With graphical, real-world information about your rooms and equipment, you can add, edit, query, and delete database records directly from AutoCAD and publish immediate updates to your facility drawings. With this dynamic link between your drawings and data, database changes made outside the AutoCAD application also appear immediately in your intelligent drawings.

Make Room or Find It

Select rooms and equipment individually or in groups, and then edit the resulting information directly in AutoCAD. Rooms are immediately hatched upon occupancy assignments, and legends are dynamically generated. User-defined, data-driven room and equipment labels are automatically updated.

Think Outside the Program

Facility Link can give you a little time to think. When you need to work on or revise facility drawings remotely, you can temporarily disconnect from the database. When you reconnect, any modifications you made to the drawings automatically synchronize with the existing database, helping you save time and money.

Go Beyond CAD

Publish your drawings to Facility Manager and enable team members who don't use computer-aided design (CAD) software to access and modify facility drawings and data. Query, pan, zoom, print, and share facility information outside CAD-based programs.

FMDesktop Components

Autodesk® FMDesktop includes three additional components to complement Autodesk Facility Link and provide a complete solution for your facility management needs.

Autodesk® Facility Manager

Manage all facility drawings and data in one database environment. Query, pan, zoom, print, and share facility drawings and data.

Autodesk® Facility Web

Use the web to access and share all facility data and drawings through the Internet or your organization's intranet.

Autodesk® Facility Request

Help your facility occupants enter service requests ranging from corrective maintenance to moves.

Learn More or Purchase

For more information about Autodesk FMDesktop and Facility Link, visit www.autodesk.com/fmdesktop.

For more information on extending the power of your facilities management capabilities, visit www.autodesk.com/subscription.

For more information on making the most of your software investment, visit www.autodesk.com/consulting.

Purchase FMDesktop through an Autodesk Premier Solutions Provider or Autodesk Authorized Reseller. To locate the reseller nearest you, visit www.autodesk.com/reseller.
